1 section

1.1 subsection

1.1.1 subsubsection

1.1.1.1 paragraph

1.1.1.1.1 subparagraph

subsubparagraph (What? You wanted more?)

An ionocraft ¹ or ion-propelled aircraft (commonly known as a lifter or hexalifter) is a device that uses an electrical electrohydrodynamic (EHD) phenomenon to produce thrust in the air without requiring any combustion or moving parts.
